- [✓ Check that your study follows appropriate reporting guidelines](#)
- [✓ Read the license agreement](#)
- [✓ Prepare funding and competing statements](#)
- [✓ Consider posting a preprint](#)
- [✓ Access the submission system](#)

We offer format-free initial submission

PLOS ONE waives all formatting requirements until your manuscript has received a provisional Editorial Accept decision.

Review the quick checklist below to begin preparing your submission.

This will help ensure that your submission is complete and gets handled as quickly as possible.

✓ Make sure your manuscript is a good fit for *PLOS ONE*

Read the [criteria for publication](#) and [journal scope](#) for information on what we publish.

PLOS ONE does not consider presubmission inquiries.

✓ Prepare your data

Remember to deposit your data in an appropriate data repository, or format and submit it as Supporting Information. Be ready to provide a Data Availability Statement. [Read our policy on data availability.](#)

✓ **Confirm the author list**

Do you have the following information for all authors listed on the manuscript?

- Full names, including initials if used
- Affiliations
- Email address
- Any potential competing interests
- Funding information
- Author contributions
- Order of authors

Make sure the corresponding author has an ORCID iD and all authors are aware of the submission. [Read more about preparing the author list.](#)

✓ **Read the license agreement**

PLOS applies the Creative Commons Attribution (CC BY) license to works we publish. Under this license, authors agree to make articles legally available for reuse, without permission or fees, for virtually any purpose. Anyone may copy, distribute, or reuse these articles, as long as the author and original source are properly cited.

You must be prepared to sign the license agreement on behalf of all the authors. [Read our licenses and copyright policy.](#)

✓ **Consider posting a preprint**

PLOS encourages authors to post preprints as a way to accelerate the dissemination of research. Authors of manuscripts in the life and health sciences can take advantage of our partnerships with bioRxiv and medRxiv to post a preprint as part of the PLOS submission process. Alternatively, authors can

provide the DOI for a previously posted preprint at the repository of their choice.

✓ **Access the submission system**
